April - June 2025

2nd Quarter Report on Annual Maintenance Contract of Enterprise Resource Planning System

Athang ICTech
Athang Private Limited

Introduction

The Annual Maintenance Contract (AMC) phase of the Enterprise Resource Planning System (ERP System) of Bhutan Postal Corporation Limited (BPCL) began in January 2025. Athang Private Limited (APL) has been providing technical backstopping services and support for continuous and seamless functioning of the ERP system.

The report is submitted for the second quarter period from **1 April to 30 June 2025**.

Work Report

During the period, the following tasks were successfully delivered:

1. **Development of Domestic Tracking System:** The Domestic Tracking System was developed and delivered, which is currently in full use. Since it was a new system development, the tasks included study and analysis, system and functional requirements gathering, design, development, staging, user acceptance testing (13-20 May, 2025) and implementation.

   The system is located on the BPCL server and currently running on two servers (oracle & onsite at BPCL). The parallel deployment will be enabled till 15 July 2025, after which it will be dephased from Oracle database and fully operationalized from BPCL servers.

2. **Enhancement and change requests of Stock Inventory Module:**
   - 2.1. Added a column in the stock report to capture "pending" status if the dispensed stocks from a source location were not received by a destination location.
   - 2.2. Disabled the commit button after creating a new product.

3. **Enhancement and change requests of Human Resource Module:**
   - 3.1. Enhanced the module to show only the approved leaves of the employees.
   - 3.2. Removed the "department" field from the leave report .
   - 3.3. Under the notesheet sub-module, new features were created to segregate the notesheets by status (new/pending/approved/rejected/forwarded). The enhancement would improve tracking of notesheets and allow filtering by status type, at different management levels.
   - 3.4. Added the sum calculation function to show total for each earnings, deductions and summary in the paysheets.
   - 3.5. Added a column to include advance salary deduction in the paysheet.
   - 3.6. Resolved the leave deduction of 0.5 day for Saturday leave for employees in the regions and post offices.
   - 3.7. Resolved the attendance issue for employees whose attendance were not correctly recorded in the monthly attendance list. There was a mismatch of employee details (Citizenship Identity Number), which has been resolved.

3.8. Resolved the issue of mismatch of manual salary deductions and system salary deductions of the employees (debit and credit) in the payroll voucher.

3.9. Resolved and updated the correct annual leave balance of employees, by restoring leave balance and including the previously availed leaves.

3.10. Under the leave sub-module, new features were created to segregate the leaves by status (new/pending/approved/rejected/forwarded). The enhancement would improve tracking of leaves and allow filtering by status type, at different management levels.

3.11. Updated the leave module to capture the leave entitlements of employees on probation (casual leave, maternity leave, bereavement leave and medical leave).

3.12. Resolved and corrected the amount in the remittance report of the deductions.

3.13. Added a column in the remittance report under payroll report for Date-of-Birth of employees.

3.14. Enabled generation of correct PF report.

3.15. Disabled TPN of resigned employees and created provision to reactivate the TPN if the retired employees rejoined.

3.16. Under the travel sub-module, new features were created to segregate the travel authorization and travel claim by status (new/pending/approved/rejected/forwarded). The enhancement would improve tracking of travels and allow filtering by status type, at different levels of management.

3.17. Enhanced the viewing of employee history in ascending order by date.

3.18. Provided location access to the Head of Finance, for the Head to access the accounts reports.

4. Enhancement and change requests of Finance Module:

4.1. Attended and resolved the general ledger report printing to allow downloading and printing of the entire reports.

4.2. Edited the wrong sub-head selection and incorrect amount entries.

4.3. Changed, edited and deleted wrong entries entered by the users, upon request from IMA division or the focal pearson.

4.4. Added field validation on the debit and credit of IMA report, which could strengthen correct entries by the users.

4.5. Resolved the issue of display of debit and credit values in the IMA report.

4.6. Added a column in the TDS deduction bill to pull the location against the house owner details.

5. Enhancement and change requests of Sales Module:

5.1. Resolved the issue related to the downloading and opening of the sales invoice PDF file.

5.2. Developed the issuance of Joint-stamp sub-module under Point of Sale.

Athang © 2025
Unauthorized copy is strictly prohibited.

5.3. Developed and enabled the mandatory requirement to capture the payment mode during renewal of the Post Box. The payment has been linked to the transactions.

5.4. Disabled the "confirm" button after a single click.

6. **Enhancement of Assets Module:**

6.1. Resolved the issue of asset depreciation not committing after submitting the depreciation.

6.2. Developed the *search* feature to locate the employee list based on location, allowing easy editing and adding of employee lists.

6.3. Added the employee ID against each employee to allow easier selection of custodians of assets.

7. **Enhancement of Fleet Module:**

7.1. Linked the income head from secondary vehicles to show and list all income heads while adding Vehicle incomes.

7.2. Developed the feature to show POL expenses report under Vehicle Expenses in the Fleet Management Report.

8. **Enhancement and change requests of PSWF Module:**

8.1. Changed the status from *pending* to *committed*, after submitting the EMI to the Finance.

8.2. Under the PSWF sub-module, new features were created to segregate the benefits by status (new/pending/approved/rejected/forwarded). The enhancement would improve tracking of benefit claims by the employees and allow filtering by status type, at different levels of management.

9. **General:**

9.1. Integrated and relocated the external links of Dispatch, Domestic Tracking and Hall Booking to the navigation bar (NavBar) for easy access.

9.2. Updated the layout of the NavBar.

9.3. Disabled the blocked users to log in into the system.

9.4. Updated the queries in the database scheduling to improve data management and system efficiency.

10. **Regular server side tasks included:**

10.1. *Regular Backups:* Ensured daily backups of databases and configurations to prevent data loss.

10.2. *Security Patches:* Applied the latest security updates and patches to the server to protect against vulnerabilities.

10.3. *Performance Monitoring:* Continuously monitored server performance to identify and resolve any potential bottlenecks.

10.4. *Disk Space Management:* Monitored disk usage and cleared unnecessary files to prevent server overload.

10.5. *System Health Checks:* Ran routine checks to ensure all server services and processes are functioning correctly.

10.6. *Software Upgrades:* Updated ERP software and dependencies up-to-date to maintain compatibility and security.

Observations

General observations included:

1. The majority of the issues reported and attended to were pertaining to the Human Resource module, particularly related to Leave.
2. There was no downtime experienced during the quarter. The system functioned without any major technical issues.
3. Data entry related errors, while substantially reduced as compared to before, continue for fields like dates and amounts, and while choosing the right account subheads.
4. The reversal entry related issues have drastically reduced. A few which were reported were attended and resolved.
5. The lesser requests for data correction and technical support is a progressive indication of the users becoming more comfortable and proficient in using the system.
6. There is a need to strengthen the communication between BPCL and APL, preferably through one channel. Multiple personnel raising or sending issues over different channels (calls, WhatsApp messages, google-sheet) tends to overlook the concerns, leading to delayed responses or non-recording of the issues.
7. All the requests, issues and concerns raised required coding-level effort, ranging from a few hours to some requiring several days of resources, depending on the severity of the request.

Tasks for 3rd Quarter

Following change requests and enhancements would entail new requirements gathering, redesign of the processes and database, and change in work-flows and management decisions:

1. Capturing stock details of new products created under the Stock Inventory module and reporting.
2. Feature to list the employees who are due for promotion on select dates.
3. The "Submit to Finance" button under the HR Module was enabled to review the multiple payroll entries by the HR Department. The feature will be disabled once the users ensure correct order payroll entries.

Athang © 2025
Unauthorized copy is strictly prohibited.

4. A large number of dynamic rows with calculations were added under IWR receipt, leading to complexity in data validation. This would merit a further study in order to streamline and avoid recurrence of similar issues in the future.
5. The display of zero figures in the balance sheets will be reviewed after the financial closings.

APL continued to invest in a dedicated team to attend to the BPCL ERP system and has rendered the support unconditionally, both technical and troubleshooting services, including during off-hours and weekends. The team had ensured that all requests from BPCL team were attended within the earliest possible timeline.
